I secured a 'B' grade and 55.38% .

Secondary Education , State Board

7 th June 2013

I secured an 'A' grade and 78.40%.

PROJECTS

DevBootCamp — Node and Express Backend Project

In the project have registration and Authentication and Multi-level access control functionality and enrollment functionality

Currently Learning

.net Core 3.1, Block Chain,
Advance Data Science,
Angular js, Ruby and Rails,
Deep learning Tensorflow,
Kears, CNN, RNN, Spring
Boot, Deno, cloud security

SKILLS

Machine Learning, Data
Analysis

Web Development

Technology :-

Node Js(JavaScript) & Express

Django, Flask

Android Developer

Backend Technology :-

Oracle 11g, MySQL,

Microsoft Sql Server,

MongoDB, Firebase,

PostgreSQL, SQLite

Frontend Technology :-

React,HTML5, CSS3

Certification

Deep Learning Specialization
certification From coursera

Developing Application Using
Google Cloud Platform
Specialization
certification From coursera

Self-Driving Car
Specialization
certification From Coursera

E-commerce — MERN Stack

I used MongoDB Atlas as cloud database and integrated with Stripe and Braintree as Payment gateway Used React and Node js and Express js

Banking and Insurance Analysis — Python

Demo: <https://rjptechsolutions.github.io/BIDashboard/index.html>

Repository :-

<https://github.com/rjptechsolutions/Banking-And-Insurance-Analysis>

Emotion Detection — Keras, Tensorflow and opencv

Repository :- <https://github.com/rjptechsolutions/Emotion-Detection>

BT Real Estate — Django, python

It is a full stack django Application of a real estate company. Like 99ecros.com https://github.com/rjptechsolutions/btre_project

BNB — Android with Java

BNB is our College TechFest Application. It's a type of informative app with registration and entry fees paid using Stripe as payment gateway.
